As discussed during the personal interview, none of the applied references disclose a plastic substrate having a honeycomb structure with a thin wall part and a thick wall part

thicker than the thin wall part formed at an opening part of the honeycomb structure, and an escape part to which excessive portions of the plastic laminate member are moved by deforming the thin wall part according to pressure loaded at a time when mold member is pressed against the laminate member, as in amended independent Claim 1.

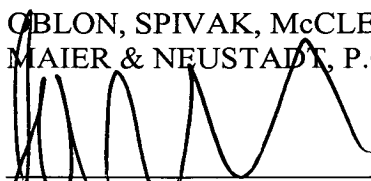

The remaining dependent claims are allowable for at least the reasons discussed above with respect to independent Claim 1, and for the individual features they recite. Withdrawal of the rejections of the dependent claims is respectfully requested.

For the foregoing reasons, it is respectfully submitted that this application is now in condition for allowance. A Notice of Allowance is earnestly solicited.

Should the Examiner deem that any further action is necessary to place this application in even better form for allowance, the Examiner is encouraged to contact the Applicants' undersigned representative at the telephone number listed below.

Respectfully submitted,
